On-Site Training of
their Employees***

Our Programs include orientations, cross training and continuing education.

Description

Today's nursing executive and managers are expected to maintain competency in their role. Certification, as a Nurse Executive or Nurse Executive, Advanced is one way to assure these individuals have an understanding of management theory and its practical applications. This one day course will provide an overview of the key issues that will be tested in these exams.

Course Objectives:

- Practice test taking skills with sample tests.
- Identify the theoretical and structural systems that are important for the successful operation of a nursing department.
- Identify the financial and marketing issues that need to be addressed for cost containment.
- Examine the human resources issues that need to be addressed to create an efficient, effective and satisfying work environment.
- Discuss the professional ethics and bioethical issues important for today's professional nurse to understand.
- Interpret the effect of Federal, State and accrediting organizations' regulation on health care organizations.
- Recognize the key issues related to labor relations and professional liability of nurses.
- Identify management and executive actions necessary to create a professional practice environment.
- Develop a plan of study for the exam.
