Palliative Care Education Modules

***Offering to
Organizations for
On-Site Training of
their Employees***

Our Programs include orientations, cross training and continuing education.

Palliative Care Education Modules

In order to create a program to meet the specific needs of an organization, the following modules are available and can be combined to meet the learning needs of the participants.

➤ Bereavement

1. Perinatal Bereavement – This full day program is designed for nurses and healthcare providers who want to develop competence in utilizing therapeutic interventions to facilitate mourning following perinatal loss.

2. Pediatric Bereavement – This full day program is designed for nurses and healthcare providers in dealing with pediatric terminal illness and death. Specific resources and a family systems approach are emphasized.

3. Overview of Bereavement – This program can be customized to various time frames and content includes types of loss, stages of grief, the mourning process, caregiver stress and therapeutic interventions.

➤ Complementary Therapies

This program provides an overview of alternative therapies offered to palliative care patients and their families. Modalities discussed include: Mind-Body, Movement, Energy, Sensory, Spiritual, and Herbal. Extensive resources are provided for those interested in follow-up and program implementation.

➤ Cultural Diversity

This program can be taught separately or integrated into other content. Organizations are asked to provide information about the specific cultures they serve. Content includes ethnic rituals, communication styles and patterns of coping.

➤ Ethics/Legal issues

This program provides the legal perspective and ethical considerations of: informed consent, advanced directives, living wills/health care proxy, withholding and withdrawing life sustaining treatments, allocation of resources, and decision making.

➤ Interpersonal Communication

Effective communication is often viewed as the hallmark of palliative care. This program addresses the essential of communication, barriers, conveying bad news, non-verbal communication, empathy and interdisciplinary collaboration.

➤ Orientation to Palliative care

This program services as an introduction to the concept of palliative care. Content includes: death and dying, principles and goals of palliative and hospice care, roles of healthcare professionals in end of life care, and care for the caregiver.

➤ Patient /Caregiver Education

This program addresses the educational needs of patients and families. Specific content includes the physical, psychological and emotional self-care that individuals need to be taught and supported in performing.

➤ Psychosocial Issues

This program addresses the psychosocial issues that are frequently experienced by patients, families and staff in palliative care. Topics include: Psychosocial history, anxiety/panic disorders; depression; risk assessment for suicide; psychopharmacology, support groups and criteria for psychiatric referral. The program can be effectively combined with Bereavement content.
